

## 24/7 Remote Diagnostics

You can upgrade your Yacht Lifeline 24/7 Medical Assist Service to include Tempus IC. This will allow a person in a remote area at sea with no medical experience to collect a sick person's vital signs such as blood pressure, pulse and heart condition. This data can then be transmitted from the yacht via satellite to our ground-based medical experts for analysis and medical advice.

*The best medical attention no longer relies on being in the right place at the right time*

**Tempus IC** is a breakthrough in telemedicine. It integrates years of R&D, innovation, real-world experience and unique communications technology. This makes accessing the best medical attention easy, fast and reliable.

**Tempus IC** provides the information doctors need to identify up 98% of conditions remotely.

Clever design solutions unite a full set of medical parameters with simultaneous real-time voice and video to enable confident remote diagnosis.

**iAssist** screens step you through every process

Highly robust, sand proof & water-resistant

A full set of integrated medical parameters

Daylight readable, impact resistant touch screen

Small, lightweight and easy to carry

Intelligent battery management keeps **Tempus IC** ready for use

Wireless headset

Integral camera with backlight for use in low-level light conditions

**RapidPack** clip ensures fast and easy deployment

**Dimensions:**  
H 203mm x W 276mm x D 97mm  
**Weight:** 2.8kg

-  Glucometer
-  Breath gas analysis and respiration
-  Tympanic temperature
-  Blood pressure and pulse oximetry
-  Full diagnostic 12-lead ECG
-  Real time voice and data
-  Photo and real time video
